MODYFICATION OF CONTRACT AWARDING NOTICE

re. delivery of hyperspectral radiance and irradiance sensors for above water determination of remote sensing reflectance

The Contracting Authority – Institute of Oceanology, Polish Academy of Science informs about modification of the content of the Contract awarding notice no IO/ZN/6/2015:

1. In Chapter III of the notice - Description of requirements and technical specification in point 3 indent 3:
There is " Marine cables to connect radiometers with the integrator 1.5m - 4 piece"
There should be "Marine cables to connect radiometers with the integrator **1m** - 4 piece"
2. In Chapter III of the notice - Description of requirements and technical specification in point 3 indent 4:
There is "Waterproof cables to connect integrator with deck unit: 15m-1pc, 50m -2pc, 100m-1pc"
There should be "Waterproof cables to connect integrator with deck unit: 15m-1pc, 50m -**1pc**, 100m-1pc"

Justification

The Contracting Authority in Description of requirements and technical specification by mistake stated wrong length of the waterproof cables to connect integrator with deck unit and wrong amount of 50m waterproof cables to connect integrator with deck unit.

Therefore the Contracting Authority modifies the Contract awarding notice as described above.

Due to the fact that between publication of the Contract awarding notice and modification passed short period of time and long period of time remaining for submitting bids – the final date of submitting bids remain unchanged.
